Introducing the “**SanGreal™**” **Gold Series** Instrument Amplifier

Las Vegas, Nevada – November 2013

Made in America, the **SanGreal™ Gold Series** Instrument Amplifier has been developed specifically for, and is dedicated to Musicians who demand the highest quality sound reproduction of guitars and other fine instruments.

From our proprietary high-low frequency driver arrangement, to breakthrough acoustic cabinetry, every detail of the **SanGreal's™** design has been precisely cultivated to perfectly reproduce both acoustic and electric instrument's most delicate notes to the most brilliant transients.

The Amp's proprietary vacuum tube and solid state design delivers the choice of an ultra-clean sound or a subtle to moderate amount of tube tone. Whether played clean or with tube tone, the result is a wonderful sweet sound.

For added flexibility, the Gold Amp's cabinet is fitted with a pole cup for mounting the amp on a speaker stand. This feature expands the use of the Amp as house sound for small to medium size venues and side fill stage speakers.

Musicians who demand perfection are often left amazed by the performance of the **SanGreal™** Gold Series amplifier.
